BACKGROUND AND DISCUSSION

Agreement No. 200286B provides for the reimbursement of costs for certain mandated services associated with the performance of trapping and inspection activities related to ACP. ACP is a tiny insect that may go unnoticed on citrus trees but could have devastating consequences for California citrus if not managed. The insect feeds on citrus leaves and stems and can infect citrus trees with a bacteria that causes citrus greening disease. While not harmful to humans, the disease kills citrus trees and has no cure. The best way to protect citrus trees is to identify the geographic spread of the insect and stop its movement.

Agreement No. 170909B provides for reimbursement to the County for nursery inspections performed to ensure Napa County is free of harmful agricultural pests. Activities consist of enforcement of laws and regulations pertaining to nursery stock, including licensing requirements, in accordance with the Memorandum of Understanding between CDFA and the California Agricultural Commissioners and Sealers Association.
