

EXHIBIT 1

Revised Mitigation Measure 6-1

Mitigation Measure 6-1: In order to offset the construction emissions from development of the Proposed Project, the Applicant shall place in permanent protection no less than 267.7 acres of woodland habitat. The 267.7 acres to be protected shall be identified from the eligible woodland habitat depicted in the map and spreadsheet attached to this measure. The area to be protected shall include a buffer of 30 feet from the edges of any areas to be cleared that would otherwise be eligible for preservation, as indicated on the map attached to this measure. All acreage designated for preservation shall be identified as such in a conservation easement with an accredited land trust organization such as the Land Trust of Napa County as the grantee, or other means of permanent protection. The conservation easement shall be prepared in a form acceptable to County Counsel and entered into and recorded with the Napa County Recorder's office prior to any ground disturbing activities, grading or vegetation removal, or within 12 months of project approval, or whichever occurs first.

Any request by the permittee for an extension of time to record the conservation easement shall be considered by the Planning Director and shall be submitted to Napa County prior to the 12 month deadline, and shall provide sufficient justification for the extension.

Land placed in protection shall be restricted from development and other uses that would potentially degrade the quality of the habitat (including, but not limited to, conversion to other land uses such as agriculture, residential, or urban development, and excessive off-road vehicle use that increases erosion), and should otherwise be restricted by the existing goals and policies of Napa County.

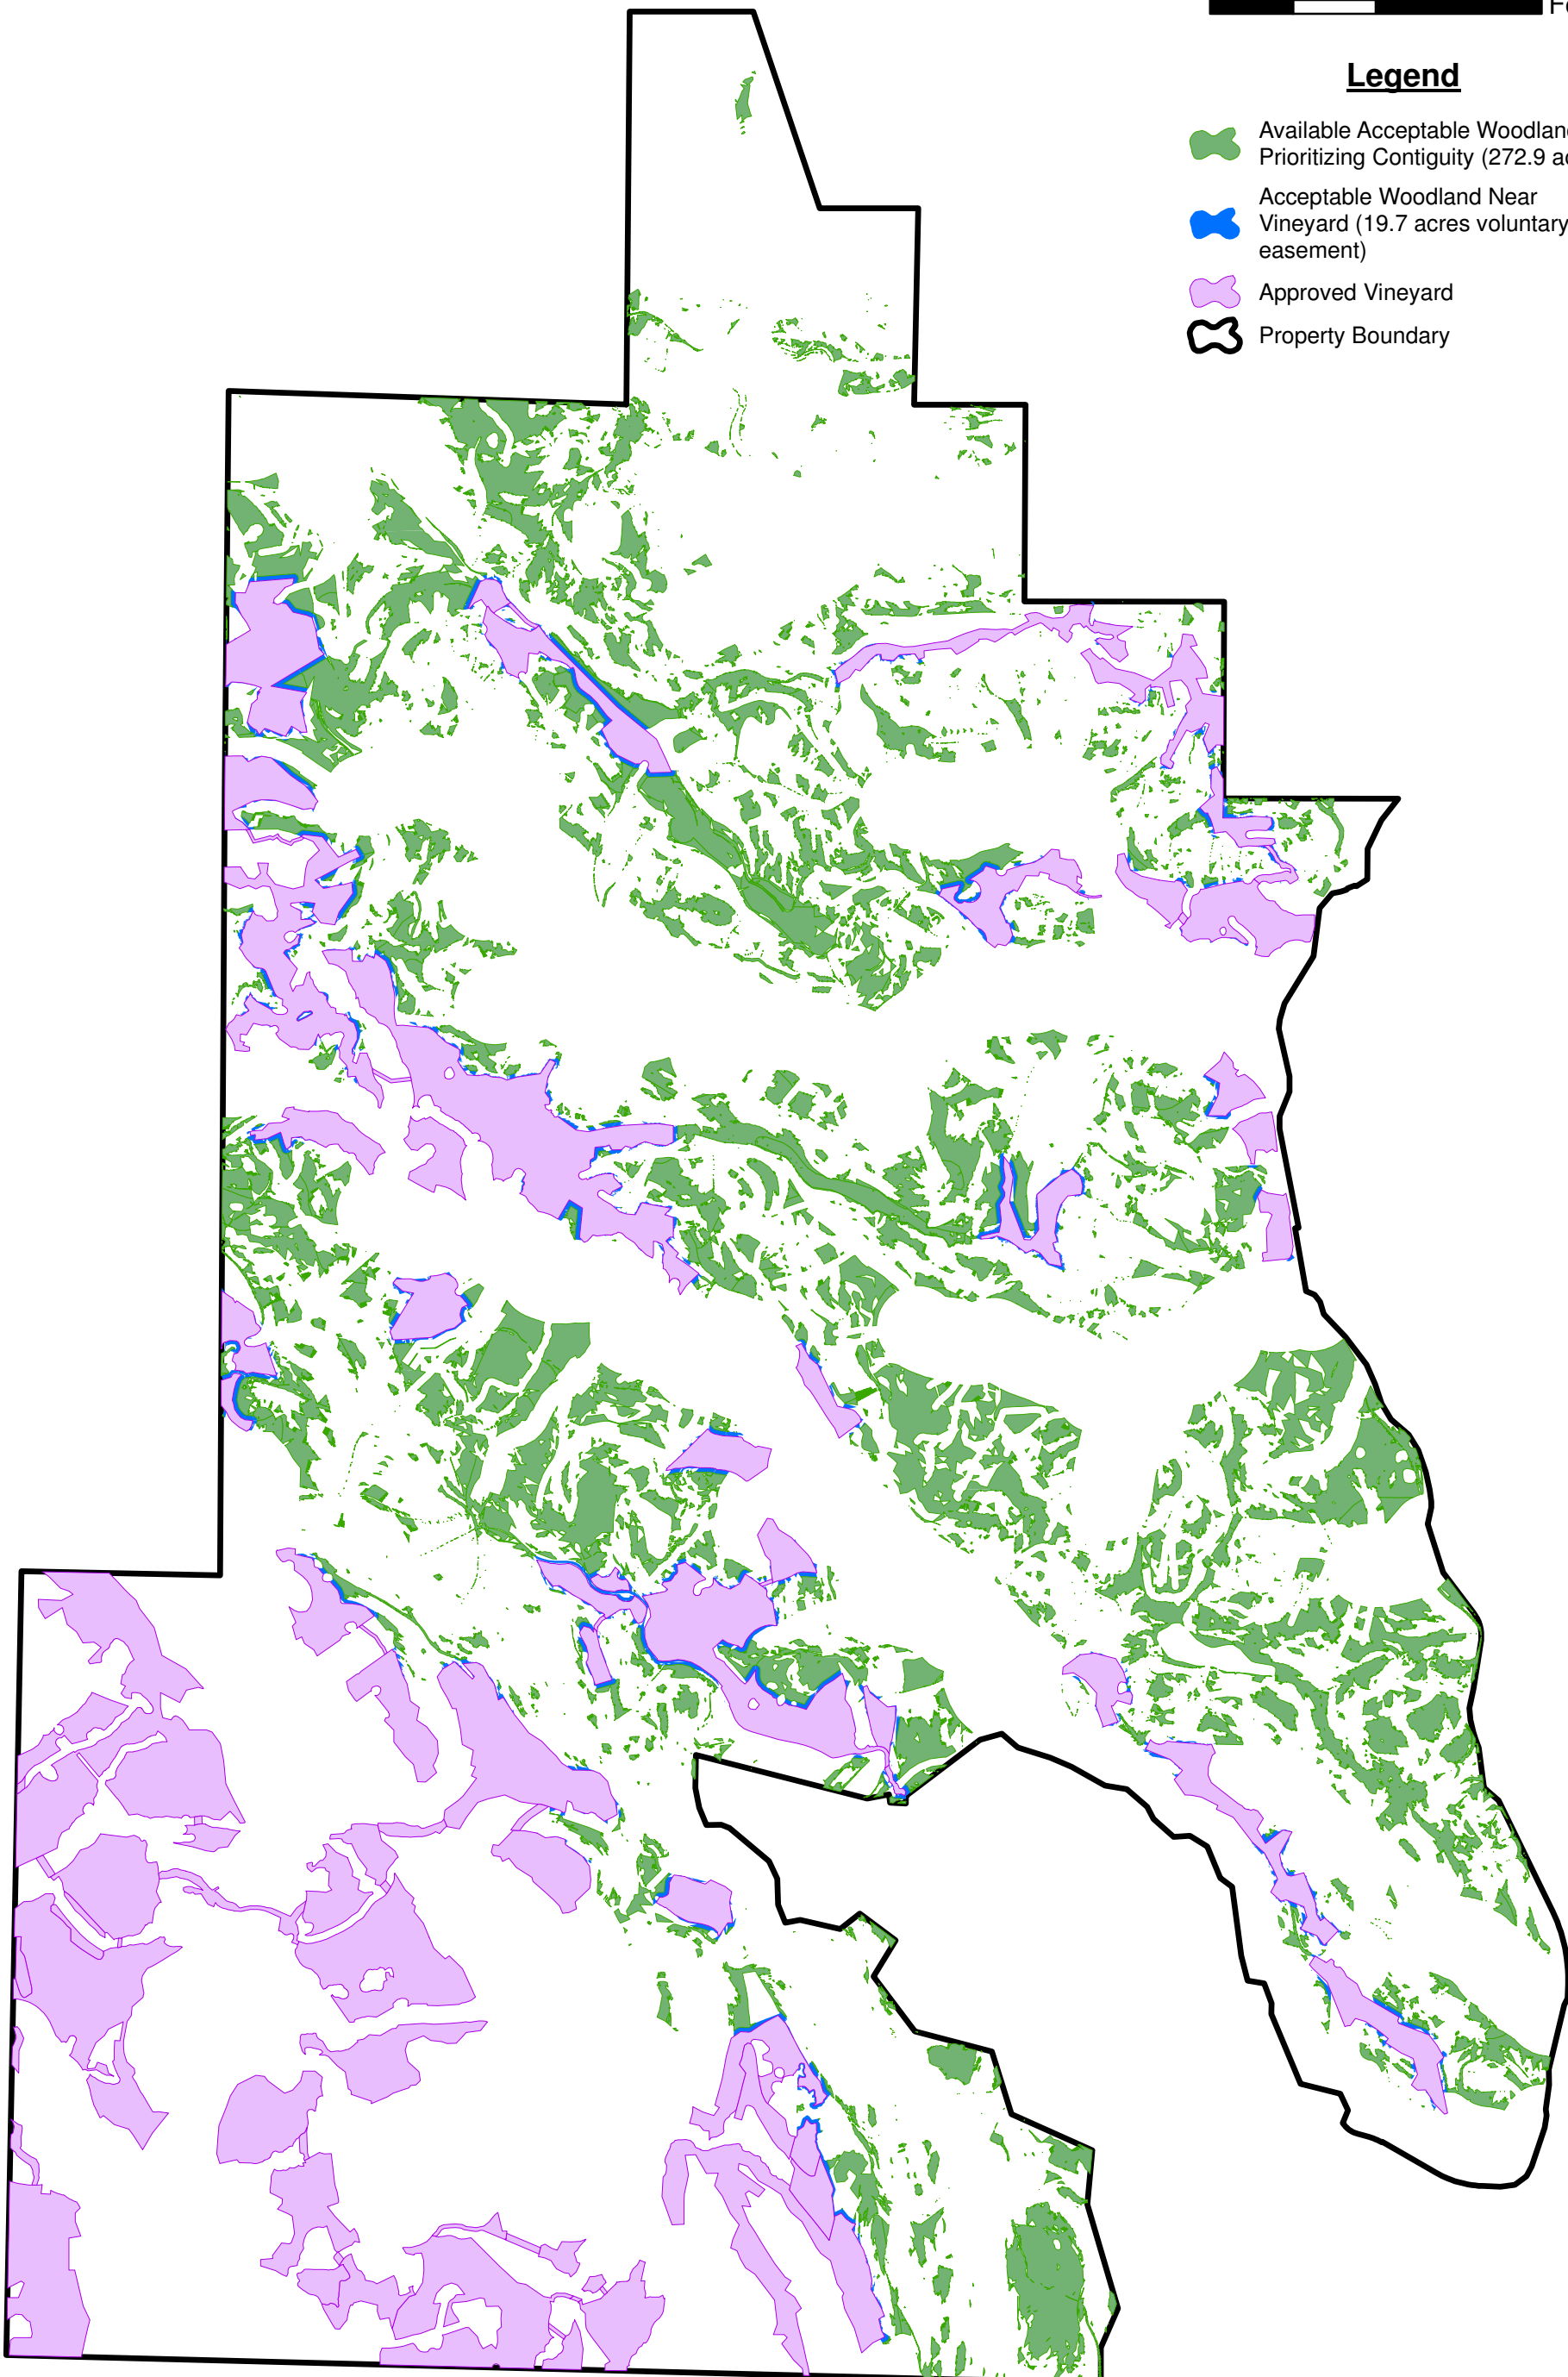

The Biological Resource Management Plan and MMRP shall be revised to incorporate the conservation easement required by this mitigation measure, including the map and spreadsheet attached hereto.
