RE: Proposal for LBRID Tank 3 Water Storage Tank Project Amendment

Dear Mr. Silke:

GHD is pleased to present this proposal for additional services related to the Tank 3 Water Storage Tank Project. Per your request GHD completed the following additional design and on-site construction observation services that were finalized based on the Tank 3 Project construction schedule, recent meetings and discussions:

GHD completed modifications to the design of the Tank 3 access road to accommodate additional runoff control after the winter storms caused damage to the road surface and storm water collection ditches that existed at the bottom portion of the road. Modifications included additional grading, installation of a new roadside ditch, runoff control and additions of water bars to better manage runoff during large storm events. In addition, GHD provided on site construction observation while the road was constructed.

GHD provided design related services and specifications for adding Automatic Transfer Switches to the pump stations and battery warmers to the generators at Tanks 1 and 2. In addition GHD developed specifications for making changes to the Omni antennae at the water treatment plan control building.

Fee

GHD provided the above described scope of services for a lump sum fee of \$6,000. We look forward to completing the project. If you have any questions, please feel free to contact me at (707) 599-6936.

Sincerely,
GHD Inc.
