**DECLARATION OF ANTHONY G.
ARGER IN SUPPORT OF
PETITIONER'S MOTION TO
AUGMENT THE ADMINISTRATIVE
RECORD**

[CEQA Matter]

Date: January 11, 2019

Time: 8:30 am

Dept.: I

Action filed: September 20, 2017

28 I, Anthony G. Arger, declare as follows:

Declaration of Anthony G. Arger

1 1. I am counsel of record for Petitioner Soda Canyon Group (“SCG”).

2 2. Except as otherwise qualified below, I have personal knowledge of the facts set
3 forth in this declaration, and if called today as a witness, I could and would testify competently as
4 to such matters set forth herein.

5 [REDACTED]
6 [REDACTED]

7 4. Attached hereto as **Exhibit 2** are four photographs of the Atlas Fire on Soda
8 Canyon Road taken by Soda Canyon resident Shelle Wolfe during the night of October 8, 2017,
9 or early in the morning on October 9, 2017. Her declaration verifying the date, location, and
10 authenticity of these photographs is included herewith.

11 5. Attached hereto as **Exhibit 3** is a series of photographs pertaining to the Atlas
12 Fire on Soda Canyon Road that were taken in the spring of 2017, in or around the time of the
13 Atlas Fire in October 2017, and after the Atlas Fire in November 2017. These photographs
14 show what Soda Canyon looked like approximately six (6) months before the fire as compared to
15 what it looks like after. I either took these photographs, was present when they were taken, or
16 know and am familiar with the exact location of where said photographs were taken, and can
17 thus verify their approximate date, location, and authenticity. [REDACTED]

18 [REDACTED]
19 [REDACTED]
20 [REDACTED]

21 [REDACTED]
22 [REDACTED]
23 [REDACTED]
24 [REDACTED]
25 [REDACTED]

26 7. Attached hereto as **Exhibit 5** are (1) three maps of the Atlas Fire created by Dr.
27 Amber Manfree (“Manfree maps”), (2) a series of map images of the Atlas Fire created and/or
28 maintained by the California Department of Forestry and Fire (“CalFire”) that are publicly

1 available online ([http://calfire-](http://calfire-forestry.maps.arcgis.com/apps/webappviewer/index.html?id=58dc77306bf448c6ac5f756af51f3ae5)
2 [forestry.maps.arcgis.com/apps/webappviewer/index.html?id=58dc77306bf448c6ac5f756af51f3a](http://calfire-forestry.maps.arcgis.com/apps/webappviewer/index.html?id=58dc77306bf448c6ac5f756af51f3ae5)
3 [e5](http://calfire-forestry.maps.arcgis.com/apps/webappviewer/index.html?id=58dc77306bf448c6ac5f756af51f3ae5)) that I personally downloaded/screenshotted from the above website (“CalFire Online
4 Maps”), and (3) a set of maps included in a report titled Atlas Incident Southern LNU Complex
5 CALNU 10046 Damage Inspection Report (“Atlas Damage Inspection Report”) dated October
6 25, 2017. Dr. Manfree’s declaration verifying that she created the above-referenced Manfree
7 maps is included herewith.

8 8. The Manfree maps and CalFire Online Maps depict the location of the proposed
9 Project site in the mouth of the Atlas Fire. Both sets of maps also clearly depict the steep canyon
10 geography of both Soda Canyon, through which Soda Canyon Road runs, and Rector Canyon, a
11 draw from which runs directly adjacent to the Mountain Peak parcel. This draw contains one of
12 the two blue line creeks nearest to the Project site. The vegetation in this draw burned during
13 the fire, and spread to vineyards on the Project site. See **Exhibits** ■■■ 5.

14 9. Included in the Atlas Damage Inspection Report attached hereto as **Exhibit 5** is a
15 map titled “Fire History Map,” showing fires in and around the Soda Canyon Road/Atlas Peak
16 area dating back to the 1950s. Dr. Manfree created a similar map, included in **Exhibit 5** attached
17 hereto and entitled “Soda Canyon Road Regional Fires” that more clearly demonstrates where
18 the historical fires occurred. Also included in the Atlas Damage Inspection Report is a map titled
19 “Fire Progression Map,” depicting how quickly the Atlas Fire spread, and shows that during the
20 first day of the fire, from late on October 8, 2017 to October 9, 2017, the fire burned 22,110
21 acres, including the entirety of lower Soda Canyon Road, and by October 10, 2017, the fire
22 burned another 20,070 acres for a total of 42,181 acres burned in just two days. This map also
23 shows the total number of acres – 51,625 – burned in the Atlas Fire. Finally, there is a series of
24 three (3) maps in the Atlas Damage Inspection Report showing the damage to structures in Napa
25 County, including the destruction of hundreds of commercial and residential buildings on Soda
26 Canyon Road, or roads accessed by Soda Canyon Road such as Loma Vista Drive, Chimney
27 Rock Road, Ridge Drive, and Soda Springs Road (collectively, “offshoots”). Dr. Manfree created
28 a similar map, included in **Exhibit 5** attached hereto and entitled “Soda Canyon Road Damage

1 Assessments,” which is based upon Napa County records, and identifies the total number of
2 structures on Soda Canyon Road – 260 – damaged or destroyed in the fire, composed as follows:

3 Residences: 134 (16 damaged, 118 destroyed)

4 Outbuildings: 122

5 Commercial buildings: 4

6 **Total Soda Canyon Road Buildings Damaged/Destroyed: 260**

7 Looking only at the residences, of which there are (or were) 163 on Soda Canyon Road or its
8 branches/offshoots, 118 residences destroyed is equivalent to 72% of the 163 residences, and
9 134 homes damaged or destroyed is equivalent to 82% of the 163 residences.

10 10. Attached hereto as **Exhibit 6** is a true and correct copy of Dr. Manfree’s
11 curriculum vitae, which she confirms as authentic in her declaration included herewith.

12 11. Attached hereto as **Exhibit 7** are true and correct copies of different excerpts
13 from the Atlas Damage Inspection Report showing of all the buildings damaged or destroyed in
14 the Atlas Fire.

15 12. Attached hereto as **Exhibit 8** is a true and correct copy of the CalFire incident fact
16 sheet update pertaining to the Atlas Fire, the incident name for which is referred to as the
17 “Southern LNU Complex.” The document indicates that the incident start time was “09:52
18 PM.”

Education

Ph.D., Geography, University of California, UC Davis, September 2014.
Dissertation: Landscape Change in Suisun Marsh
Advisor: Dr. Peter Moyle

Master of Arts, Geography, UC Davis, December 2012. Specialty in GIS and Geographic Techniques,
minor in Plant Ecology
Advisor: Dr. Peter Moyle

Geographic Information Systems (GIS) Competency Certificate, Santa Rosa Junior College, 2009.

Bachelor of Arts, Environmental Studies, Sonoma State University, September 1999. Emphasis in
Media Studies.

Research Experience

Postdoctoral research, UC Davis, 2014 - 2018. Research in ecological effects of drought in the
Sacramento-San Joaquin Delta. Research in Floodplain Ecology and fish ecology in Suisun Marsh.

Doctoral Research, UC Davis, 2012 - 2014. Read and synthesized historical record for Suisun Marsh,
described 200 years of landscape change based on the anthropological record, explorers journals,
the map record, and other sources. Designed animated maps to communicate content of the Suisun
Marsh Fish and Invertebrate Study dataset.

Masters Research, UC Davis, 2006 - 2012. Characterized hydrogeomorphic change in Suisun Marsh
based on the map record and other sources.

Research Assistant, Center for Watershed Sciences (CWS), UC Davis, 2011 - 2014. Editing,
cartography, and graphic design for Suisun Marsh: Ecological History and Possible Futures (book)
and California Drought Summit program. Microsoft Access database management and GIS support
for research and CWS publications.

Research Assistant, Landscape Analysis and Systems Research Laboratory, UC Davis, 2006 - 2011.
Modeled landscape-scale impacts of water use patterns in residential neighborhoods.

Professional Experience

Event Planning - California Drought Summit, April 2014. Participated throughout event planning
process and designed promotional materials.

Facilitation - extensive experience in meeting facilitation for non-profit and academic organizations, 1998 - present.

Field Technician and GIS Analyst - Laguna de Santa Rosa Foundation, 2005 - 2007. Lead Field Technician in landscape-scale invasive aquatic weed management program with duties including studies of treatment effectiveness, water quality monitoring, and volunteer recruitment and training. Trained coworkers, wrote field manual, produced maps, managed data, and maintained GPS equipment.

Teaching Experience

Instructor

Introduction to GIS, 2017 and 2018 courses for the UC Davis Extension
GIS for Watershed Analysis, 2018 course for the UC Davis Extension
Communicating with Maps, 2018 course for the UC Davis Extension
GIS Methods for Hydrology, Spring 2016 and Summer 2014
Practical GIS for Field Research, Fall 2012 and Spring 2013

Teaching Assistant

Introduction to Geographic Information Systems, Fall 2011
Site Ecology for Landscape Architects, Spring quarters 2007 - 2010
History of Landscape Architecture, Winter 2007

Curriculum Development

Led development of GIS curriculum plan for undergraduate studies at UC Davis; effort sponsored by James Quinn at the UC Davis Information Center for the Environment, Fall 2009

Guest Lectures

Careers in GIS. September, 2018. Invited by Professor Alison McNally to lecture undergraduate students at Cal-State Stanislaus.

How Historical Ecology informs our Sense of Place. July, 2017. Invited by instructor Sahoko Yui to lecture to UC Berkeley Landscape Architecture students about applying historical research to Landscape Design.

What does it mean to design with nature? November, 2012. Invited by Dr. Claire Napawan to lecture to UC Davis Landscape Architecture students in introductory course. Lectured on environmental ethics, landscape change geography, and reconciliation ecology.

GIS, GPS, and Cartography. June 2012. Napa Valley Personal Computer Users Group.

Genetics and Evolution for Landscape Architects, Spring 2010. Guest lecture to students in Site Ecology for Landscape Architects.

SCOPE AND INTENT

The scope of this report is focused on the Atlas Incident within the Southern LNU Complex (CALNU 010046), that began on October 8th, 2017 in the county of Napa, California.

The intent of the report is to provide an evaluation of fire damage to structures within the fire perimeter. This report attempts to include all habitable structures and outbuildings with a footprint greater than 10' X 12' throughout the fire area. The report may evaluate or identify fire damage to infrastructure, mobile equipment, or other miscellaneous parcel improvements.

DISCLAIMER

The damage inspection data is approximate and for informational purposes only. The information and data contained in this report was collected using a systematic inspection process. Data collection concluded on October 22, 2017 at 1500 hours.

Fire damage and poor access were major limiting factors for damage inspectors; therefore, a small margin of error is expected. The terrain, vegetation coverage, and large area burned by the fire made locating damaged or destroyed structures very difficult. All the structures damaged or destroyed by the fire may not be identified in this report due to these limiting factors.

Additionally, identification of structure types (such as single-story single family residence vs. multi-story single family residence) was extremely difficult in some areas due to complete combustion of all identifying features. Damage inspection (DINS) teams used their best judgment when assigning structure type classifications based on available features.

This report is based on the Firefighting Resources of California Organized for Potential Emergencies (FIRESCOPE) Damage Inspection Specialist training curriculum. This report is not designed or intended to assess the value of individual damaged structures or determine the value of the total damage caused by the fire.

METHODOLOGY

The CAL FIRE - Office of the State Fire Marshal (OSFM) damage inspection criteria, following FIRESCOPE standards, for post fire inspections was used for this incident. Data collection for each structure began with the visual confirmation by inspection teams. This visual confirmation provided the percent of the total structure that was damaged. The following chart provides the damage classification levels used in the evaluations:

Damage Classification Levels	
1-9%	Superficial Damage
10-25%	Minor Damage
26-50%	Moderate Damage
51-75%	Major Damage
>75%	Destroyed

DINS teams classified the damaged or destroyed structure into one of the following structure classifications:

Category	Structure Type
Commercial	Commercial Building - Single Story
Commercial	Commercial Building - Multi Story
Commercial	School
Commercial	Hospital
Commercial	Church
Other	Environment
Other	Miscellaneous
Other	Agriculture
Other	Infrastructure
Outbuilding	Outbuilding Greater Than 10'X12'
Outbuilding	Non-Habitable - Shop
Outbuilding	Non-Habitable - Barn
Outbuilding	Non-Habitable - Detached Garage
Residence	Single Family Residence-Single Story
Residence	Single Family Residence-Multi Story
Residence	Multi Family Residence-Single Story
Residence	Multi Family Residence-Multi Story
Residence	Mobile Home - Single Wide
Residence	Mobile Home - Double Wide
Residence	Mobile Home - Triple Wide
Residence	Mobile Home - Motor Home (if used as residence)

A structure is a habitable space when it appears to have permanent features that could be identified as a Dwelling Unit.

Dwelling Unit as defined in 2016 CBC Chapter 2 Section 202 - A single unit providing complete independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking and sanitation. Teams generally considered a structure permanent if the foundation was comprised of concrete or cinder block and was attached to that foundation. Temporary habitable structures, such as mobile homes, are included in this report and are classified separately from permanent habitable structures.

Structures greater than 120 square feet (10' X 12') are included in this report. This threshold is a common size at which a structure becomes taxable by County Assessor rules. Only outbuildings that appear to be permanent structures are included in this report.

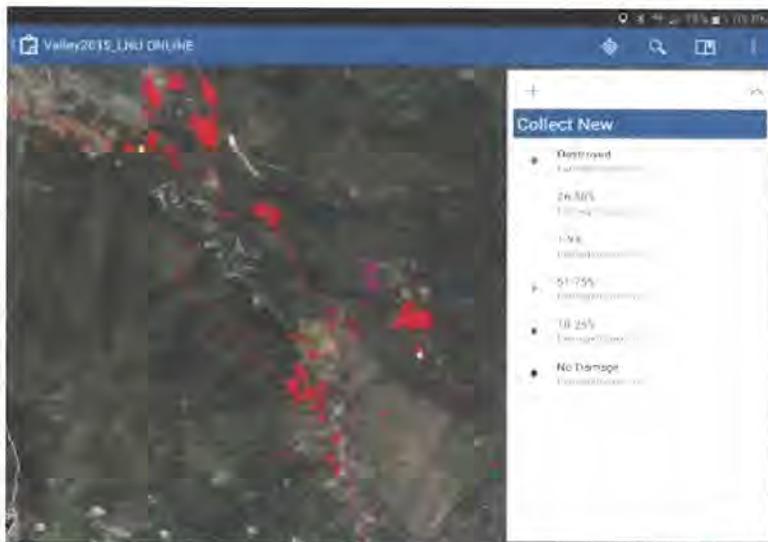

Figure 1 Data collection application

Wherever possible, all characteristics were collected that could provide fire impact to the structure. These included vegetation clearance, Public Resource Code (PRC) 4291 compliance, roof construction, type of window panes, type of exterior siding, conditions of eaves, type of deck, and vent screen usage. Relative comments by the inspection team were also included. Additionally, a photo was taken of each damaged and destroyed structure and included in the inspection report.

Damage caused by fire suppression activities are not included in this report and would be cataloged by the incident's Compensation and Claims Unit. Damage numbers are subject to change in the weeks ahead when owners who have a more detailed knowledge of their properties return. Additionally, due to complete combustion and a lack of identifying features, inspectors were unable to classify some structures into a specific structure type.

FINDINGS

In total, 903 structures were identified by the DINS team as damaged or destroyed by the Atlas Incident. 892 structures were identified in Napa County and 11 structures were identified in Solano County.

SYNOPSIS

Overall (All Counties)

Damage	Commercial	Outbuilding	Residence	Total
Destroyed	17	319	447	783
51-75%	1	1	2	4
26-50%	2	6	2	10
10-25%	1	9	11	21
1-9%	8	23	54	85
Total	29	358	516	903

Napa County

Total	1	5	5	11

APPENDIX A: STATUS OF AFFECTED PARCELS BY SITE ADDRESS

The Appendix A tables are based off the County Assessors' GIS parcel data. There may be inaccuracies with information shown and/or geospatial locations. When the GIS data did not show a site address, the table reflects an approximate field collected address and is denoted with "* Field Collected."

CALFIRE

STATUS				
Incident Start Date: 10/08/2017		Incident Start Time: 09:52 PM		
Incident Type: Vegetation Fire		Cause: Under Investigation		
Acreage: 51,064		Containment: 83%		
Incident Location: Counties of Napa and Solano				
Structures Threatened: 986		Structures Destroyed: 421		Structures Damaged: 66
RESOURCES				
Engines: 330	Water Tenders: 30	Helicopters: 15	Air Tankers: 0	Hand Crews: 61
Dozers: 36	Other:	Total Personnel: 3,253		
Cooperating Agencies: CHP Napa County OES, Sonoma County OES, Solano County OES, California State Parks, PG&E and CDCR.				
SITUATION				
Current Situation:	<p>The Southern LNU Complex is being managed in Unified Command by CAL FIRE Incident Management Team 3 and the Napa County Sheriff's Department. Firefighters continue to strengthen perimeter control lines, provide structure defense and engage in tactical patrol. As some residents are allowed to return to their homes, please drive carefully as emergency personnel are still working throughout the fire area. CAL FIRE asks the public to never fly drones in the area of wildfires. Remember, If You Fly, We Can't!</p> <p>For information on the Nuns Fire, call (707) 967-4207.</p>			
Evacuations:		<p>Sonoma County</p> <p>For information regarding evacuations and road closures please contact the Central LNU Complex Information Line at (707) 967-4207</p>
