Housing Combination District) of the Napa County Code is amended to read in full as follows:

**18.82.080 – Design Criteria.**

The following design guidelines shall be applicable to all projects within the :AH Combination District requiring a use permit. The design guidelines will be enforced through review and approval by the planning commission.

- A. General. The following shall apply to all development:
1. Buildings shall be designed to frame views of hills, vineyards and other landscape features.
  2. Natural landscape features such as creeks, wetlands and landmark trees shall be incorporated into the site design. All development shall be subject to the county's Conservation Regulations (Chapter 18.108).
  3. Site planning shall minimize the need for grading of steep slopes or hillsides. Grading shall be contoured to blend with adjacent open space.

4. Development shall be clustered on each site so as to minimize development footprints, preserve undeveloped land, and avoid areas with natural or visual resources.
  5. Building materials and architectural design concepts including colors, textures and details of construction shall be compatible with adjacent and neighboring residential properties.
  6. Painted surfaces shall use colors that reinforce architectural concepts and are compatible with natural materials such as brick or stone.
  7. Roof forms, materials, doors, windows and other architectural features of historic or traditional houses near the project shall be referenced in the design of the new development. Buildings shall use materials and design components that are indigenous to the Napa Valley including, but not limited to, exposed heavy timbers for structural supports, trellis features, gable roof elements, stone foundations, wood or split stone masonry siding.
  8. A detailed landscaping plan, including parking details, shall be submitted for review and approval prior to the issuance of building permits. The plan shall indicate the names and locations of all plant materials to be used along with the method of maintenance. Plant materials shall be purchased locally when practical. The Napa County agricultural commissioner's office shall be notified of all impending deliveries of live plants with points of origin outside of the county.
  9. The design of fences and screening shall reflect the county's predominantly rural character.
  10. All exterior lighting, including landscape lighting, shall be shielded and directed downward and shall be located as low to the ground as possible. Low-level lighting shall be utilized in parking areas at multi-family sites rather than high-intensity light standards.
  11. In compliance with county scenic highway regulations, any new housing units shall be designed so as not to be visible from county or state designated scenic routes. Where this is not possible, visual impacts from designated scenic routes shall be minimized through landscaping, grading, berms, appropriately designed fences and other screening devices.
  12. All new housing units shall be designed so as minimize their visual impacts. Visual impacts shall be minimized through landscaping, grading, berms, appropriately designed fences and other screening devices. New housing shall be subject to the county's Viewshed Protection Program (Chapter 18.106), if applicable.
- B. In addition to the criteria listed in subsection (A) of Section 18.82.080, the following shall apply to single family residential developments:
1. Entrances and windows, not garages, shall be dominant elements of front facades.
  2. Garages shall not exceed fifty percent of the width of the house.
  3. The use of shared driveways and alleyways with detached garages shall be utilized whenever feasible.
  4. Larger wall and roof planes shall include three dimensional design features such as chimneys, balconies, bay windows or dormers.
  5. The design shall promote harmonious transition in scale and character in areas between different designated land uses.
  6. Play spaces for children are strongly encouraged and shall be secure and visible.

- C. In addition to the criteria listed in subsection (A) of Section 18.82.080, the following shall apply to multi-family residential developments:
1. Building forms shall use varying roof heights, setbacks and wall planes to break up perceived bulk of buildings. Long unbroken volumes and large unarticulated wall and roof planes are not permitted.
  2. Smaller multi-family projects shall follow the guidelines for single-family residences as set forth in subsection (B) above.
  3. Architectural design concepts shall provide for a transition in scale between multi-family and any neighboring single-family residential development.
  4. Trash enclosures, storage and other accessory elements shall be designed as integral parts of the architecture.
  5. Parking lots shall be screened by shade trees, landscaping or buildings. Parking shall be unobtrusive and not disrupt the quality of open spaces and pedestrian environments. Access to the property and circulation systems shall be safe and convenient for pedestrians, cyclists and vehicles.
  6. Parking shall be enclosed in garages where feasible. Outdoor parking and garage doors shall be located so as to be minimally visible from public streets and project open spaces.
  7. Multi-family developments shall provide both common and private open space.
  8. Multi-family projects shall provide common spaces that are physically defined and socially integrated into the site plan as a gathering place.
  9. New projects will be required to provide, as part of the common space, the installation of a play structure and necessary safety equipment.

Any subdivision of the sites shall be subject to all laws, including, but not limited to, Title 17 of the Napa County Code implementing the Subdivision Map Act. For projects that require approval of a tentative or parcel map under the provisions of Title 17, an application, including designated fees, shall be made to the department, and the project must receive approval of the map as specified in Title 17.

Applications shall be processed pursuant to Section 18.124, and an application and designated fees shall be made to the department and must receive planning commission approval before the project can proceed. Applications under use permit processing procedures shall comply with the development standards set forth in Section 18.82.040, the applicable density requirements identified in Section 18.82.050, the mitigation measures identified in Section 18.82.070, and all other applicable sections of this chapter, except as those requirements may be modified under provisions of State Density Bonus Laws.

- C. Affordable units shall be comparable in number of bedrooms, exterior appearance and overall quality of construction to market rate units in the same residential project. Affordable units shall be dispersed throughout the residential project, or, subject to the approval of the planning director, may be clustered within the residential project when this furthers affordable housing opportunities.
