Subject:

2021-2022 Appropriations Limit for Napa Berryessa Resort Improvement District

Article XIIIB of the California Constitution requires the District to establish an annual appropriation limit. On June 5, 1990 the voters of California passed Proposition 111 that amended Article XIIIB of the State's Constitution relating to the calculation of a jurisdiction's appropriation limit.

One of the changes to Article XIIIB requires the Board of Supervisors to select one of two methodologies to determine the cost-of-living factor used in calculating the appropriation limit. The Board may select one of the following:

- The percentage change in California per capita personal income from the preceding vear: or
- The percentage change in the local assessment roll from the preceding year due to the addition of local non-residential new construction.

Each year we calculate the appropriation limit using both factors and recommend to the Board the factor that is most beneficial to the District. When multiplied by the population change from the preceding year, the California per capita personal income growth factor is 1.06 versus the non-residential new construction growth factor of 1.00. Therefore, I am recommending the District's appropriations limits be calculated using change in the California per capita personal income from the preceding year.

## Cumulative Growth Factor Calculation Detail
