BACKGROUND AND DISCUSSION

Farmers markets are proven to increase access to nutritious food, support healthy communities, and promote sustainability. Nationwide, farmers markets provide infrastructure to assist in the distribution of farm and value-added products, thereby contributing approximately \$9 billion each year to the U.S. economy. Napa County farmers

markets are dedicated to doing their part to address local food insecurity and last year provided over \$70,000 in food assistance to increase equitable access to local food by our low-income neighbors.

Presentation is meant to formally recognize the importance of expanding agricultural marketing opportunities at farmers markets that assist and encourage the next generation of farmers and ranchers, generate farm income to help stimulate business development and job creation, build community connections through direct farmer-to-consumer relationships across Napa County's diverse demographic and economic groups, promote healthy lifestyles, and expand agricultural diversity, sustainable and regenerative land management practices.
