BACKGROUND AND DISCUSSION

Crestwood Behavioral Health, Inc., has operated the County's Crisis Stabilization Unit for over a year. The unit provides immediate access to crisis intervention, emergency psychiatric evaluation and medication services for children, adults, and older adults in a mental health crisis, and other specialty mental health services. Contractor also offers community-based Crisis Stabilization Services (CSS) over the telephone or through face-to-face contact, 24 hours a day, 7 days per week and will address the emergency psychiatric needs of children, adolescents, adults, older adults and families in a mental health crisis. The recovery-oriented services offered in voluntary and involuntary treatment settings will promote the provision of mental health care and integrated triage for individuals who may be in a situational crisis, may have primary diagnoses of mental health disorders, and may also have co-occurring substance abuse disorders. Individuals will be given up to 23:59 hours of intensive crisis assistance onsite and offered many other services, as needed.

The current contract maximum for this agreement is \$3,000,000 per fiscal year. This amendment would increase the contract maximum by \$345,744 making it \$3,345,744 annually. The additional budget increase is due to staffing and security measures. An additional nurse, office assistant, and two recovery coaches have been added to the program, as well as the need for new operational costs such as client transportation and increased insurance fees. Without the additional funds, the CSU would be understaffed and would not be equipped to provide the range of services required by this level of care facility.
