Executive Summary

Introduction

MGT is pleased to present Napa County with this addendum to the report of findings for the fee study presented to the County Board of Supervisors in November 2024. This report includes findings for additional departments and divisions not included in the original report, as well as revisions to fees for departments and divisions that were included in the original report.

The County contracted with MGT to perform a comprehensive fee study using fiscal year 2023-24 and 2024-2025 budgeted expenditures, staffing costs, and operational information. The County's current fees represent the fees being charged at the beginning of this study.

This report is the culmination of an extensive study conducted by MGT in collaboration with the County's management and staff. MGT would like to take this opportunity to gratefully acknowledge all management and staff who participated in this project for their efforts and coordination.

Study Scope and Objectives

The study included a review of the following departments' related fee for service activities:

- ♦ PBES – Building
- ♦ Assessor
- ♦ Recorder-County Clerk
- ♦ Information Technology Services - GIS

In addition, minor revisions were made to the PBES – Environmental Health, Fire Prevention, and Public Works fees. The revisions are also included in this report.

The goal for this study was to present a well-documented and defensible cost of service plan that would identify rates that would be used to recover billable costs for services and to develop user fees that comply with Proposition 26, Proposition 218, and other applicable statutory requirements and County goals.

The study was performed under the general direction of the County Executive Office. The primary goals of the study were to:

- ♦ Define what it costs the County to provide the various fee-related services.
- ♦ Determine whether there are any services where a fee should be collected.
- ♦ Identify service areas where the County might adjust fees based on the full cost of services and other economic or policy considerations.
- ♦ Develop revenue projections based on recommended increases (or decreases) to fees.

The information summarized in this report addresses each of these issues and provides the County with the tools necessary to make informed decisions about any proposed fee adjustments and the resulting impact on County revenues.

Summary of Findings

User Fee Financial Overview

The study's primary objective was to provide the County's decision-makers with the basic data needed to make informed pricing decisions. This report details the full cost of each service for which a fee is charged and presents proposed fees at 100% cost recovery levels. The fee analysis adheres to Proposition 26, based on the "estimated reasonable cost of providing a service".

At 100% cost recovery, the fees would cover all labor and indirect costs associated with providing each service. Any reduction in the fee would not eliminate the cost of providing the service but would reduce the price to the consumer. The difference between 100% full cost recovery and any reduction in price would need to be covered through other funding sources such as the General Fund. This cost does not go away due to a price reduction and cannot be shifted to another fee to be covered based on California state law. The County established a goal in 2003 to obtain full cost recovery for the Building Division, and for other building permit-related functions of the Fire Marshal, Public Works, County Counsel and Environmental Health and 80% for all other Planning and Public Works related applications and activities. The two exceptions are: The Agriculture Commissions / Weights and Measures department, whose fees are set by statute and can't be adjusted by the County, and the Animal Shelter whose fees are to be aligned consistent with fees established by other Animal Shelters in the region.

The exhibit below shows the annualized costs and revenues for the County's user fees that were part of this analysis. It is difficult to predict future revenues due to the fluctuation in demand and economic conditions. MGT based the annual cost on the individual full cost for each fee analyzed multiplied by the annual volume statistics. The results are shown in Exhibit 1 below:

User Fee Categories	Current					Recommended		
	Full Cost User Fee Services	Current Revenue		Current Subsidy		Cost Recovery Policy		Increased Revenue
PBES: Building	\$4,396,808	\$3,281,127	75%	\$ 1,115,681	25%	\$4,273,195	97%	\$992,068
Assessor/Recorder-County Clerk*								
Information Technology Services - GIS	\$1,364	\$1,350	99%	\$ 14	1%	\$1,350	100%	\$0
PBES: Environmental Health	\$3,946,817	\$3,002,186	76%	\$ 944,631	24%	\$3,946,817	100%	\$944,631
Fire	\$536,783	\$235,840	44%	\$ 300,943	56%	\$536,642	100%	\$300,802
Public Works	\$842,639	\$620,678	74%	\$ 221,961	26%	\$840,257	100%	\$219,579
Totals:	\$ 9,724,412	\$ 7,141,181	73%	\$ 2,583,231	27%	\$ 9,598,261	99%	\$ 2,457,080

* Assessor and Recorder-Clerk were not able to provide annual volume numbers, therefore no annualized user fee costs or revenues were calculated. See narrative sections for fee details.

Exhibit 1 User Fee Study Results

- ♦ **Full Cost User Fee Services** – This column represents what it is costing the departments annually to provide user fee services. In total, this study evaluated

\$9,724,412 in costs to provide fee related services. It is this amount that was the focus of this study and represents the total potential for user fee-related revenues for the county.

- ♦ **Current Revenue** – This column represents what the county is currently recovering annually in revenue for these same services based on annual volume statistics. Based on current fee recovery levels, the county receives fee-related cost recovery in the amount equal to \$7,141,181 and is experiencing an overall 73% cost recovery level..
- ♦ **Current Subsidy** – This column shows the difference between what it is costing the county to provide services versus what is being recovered in revenue for these same services. Current fee levels recover 73% of full cost, leaving 27% or \$2,583,231 as unrecovered cost. This difference is being subsidized by other funding sources such as the general fund. This subsidy represents an opportunity for an updated and more focused cost recovery effort by the county for fee-related services.
- ♦ **Cost Recovery Policy** – Adjusting fees to the proposed cost recovery policy levels would increase the specified fee revenue to \$9,598,761. This would bring the overall cost recovery level up to 99%.
- ♦ **Increased Revenue** – \$2,457,080 in potential new revenue could be generated. This would represent an increase of 34% over the revenue currently being collected for these activities by the County on an annualized basis.

See Appendix A for details on individual fees.

Methodology

A cost-of-service (user fee) study comprises two basic elements:

- ♦ Hourly rates of staff providing the service.
- ♦ Time spent providing the service.

The product of the hourly rate calculation multiplied by the time spent yields the cost of providing the service.

Hourly Rates

The hourly rate methodology used in this study builds indirect costs into County staff hourly salary and benefit rates to arrive at fully burdened hourly rates. Fully burdened hourly rates are a mechanism used to calculate the total cost of providing services. Total cost is generally recognized as the sum of the direct cost together with a proportionate share of allowable indirect costs. The proper identification of all costs (including labor, operating expense, department administration and countywide support) as “direct” or “indirect” is crucial to the determination of the total cost of providing services.

Direct costs are typically defined as those that can be identified specifically to a particular function or activity, including the labor of persons working directly on the specific service for which the fee is charged, and possibly materials or supplies those people use for the task. Indirect costs are those that support more than one program area and are not easily identifiable to specific activities. Examples of indirect costs are: 1) departmental administrative and support staff, 2) training and education time, 3) public counter and telephone time, 4) some service and

supply costs, and 5) countywide overhead costs from outside of the department as identified in the County's cost allocation plan.

MGT's hourly rate calculation methodology includes the following:

Personnel Services Analysis – each staff classification within the department or division is analyzed in the study. The first burden factor is comprised of compensated absences such as vacation/holidays/sick leave days taken in a year's time. Staff classifications are then categorized as either direct (operational) or indirect (administrative or supervisory) labor. In some cases, a classification will have both direct and indirect duties. The total indirect portion of staff cost is incorporated into hourly overhead rates.

Indirect Cost Rate – a ratio of indirect cost to direct labor (salaries plus benefits) is established. There are three elements of indirect cost incorporated, including:

- ♦ Indirect Labor – includes compensated absences, administrative and supervisory staff costs.
- ♦ Other Operating Expenses – most services and supplies are included as a second layer of indirect cost and are prorated across all fees and services. There are some service and supply expenses classified as "allowable direct." Some examples of these are professional services expenses, or supplies. These allowable direct expenses would be directly associated with specific fees or programs, as opposed to being allocated across all activities through the indirect overhead.
- ♦ External Indirect Allocations – this represents the prorated portion of countywide overhead (from the County's cost allocation plan) which is attributable to the service for which the fee is charged.

Fully Burdened Hourly Rates – incorporates all the elements that comprise the hourly rates used in this cost analysis.

- ♦ Each direct or operational staff classification is listed, together with the average annual salary and benefits.
- ♦ The hourly salary and benefit rate is calculated by taking the annual salary and benefits of an employee and dividing by 2,080 available hours in a year.
- ♦ The overhead rate is derived by multiplying the internal and external indirect cost rates against the salary and benefit rates.

The total combines the salary, benefits, and overhead rates. This is the fully burdened rate for each staff classification. MGT prepared indirect overhead rates and corresponding hourly rate calculations using FY 2023 budgeted expenditures. The building and safety division uses one divisional hourly rate which includes all these elements but averages them together.

Time Spent

Once fully burdened hourly rates were developed for county staff, the next step was to identify staff time spent directly on each user fee activities. Each staff person involved in the user fee services identified time spent to complete each task associated with all user fee services.

Fee Calculations and Revenue Projections

Given this information, MGT was able to calculate the cost of providing each service, both on a per-unit and total annual basis (per-unit cost multiplied by annual volume equals total annual cost). As mentioned above, costs were calculated by multiplying per-unit time estimates by the hourly labor rates; additional operating expenses directly associated with certain services were also added in. Finally, if other departments or divisions provided support to certain user fee activities, this time was accounted for and added into the analysis as a crossover support activity. Full costs are then compared to current fees/revenues collected, and subsidies (or over-recoveries) are identified.

User fee summaries by department may be seen in Appendix B of this report.

Legal, Economic & Policy Considerations

Calculating the true cost of providing county services is a critical step in establishing user fees and corresponding cost recovery levels. Although it is a principal factor, other factors must also be given consideration. County decision-makers must also consider the effects that establishing fees for services will have on the individuals purchasing those services, and the community.

The following legal, economic and policy issues help illustrate these considerations.

- ♦ **Legal restrictions** – In California user fees are limited to the "estimated reasonable cost of providing a service" by Government Code section 66014(a) and other supplementary legislation. Proposition 26 was approved by California voters in November of 2010 and clarified which charges are considered user fees and which are considered taxes. The significance of this distinction is that user fees may be raised by Board action up to the limit of actual cost, whereas taxes may not be increased without a majority vote of the public. None of the fee adjustments recommended by MGT are considered taxes per Proposition 26 guidelines.
- ♦ **Economic barriers** - It may be a desired policy to establish fees at a level that permits lower income groups to use services that they might not otherwise be able to afford.
- ♦ **Private benefit** - If a user fee primarily benefits the fee payer, the fee is typically set at, or close to 100% full cost recovery. Development related fees generally fall into this category; however, exceptions are sometimes made for some services.
- ♦ **Incentives** - Fees can be set low to encourage participation in a service, such as obtaining a water heater permit.
- ♦ **Disincentives** - Penalties can be instituted to discourage undesirable behavior. Examples include fines for construction without a building permit.

Analysis Highlights

Below is a brief discussion of the findings for each department/division's analysis. Please see the user fee summary sheets in Appendix B of this report for the details on each fee calculation and cost analysis.

Fees are charged in a variety of ways including:

- ♦ Flat (or fixed) fees – the fee is always the same, regardless of size or complexity of the service provided in each instance.
- ♦ Per square foot – the fee is calculated based on the size of the project under review.
- ♦ Hourly (or time-and-materials) – County staff track time and materials expense, and fees are calculated to recover actual costs.
- ♦ Actual cost – this fee is charged to recover consultant costs as billed to the County, or time and materials of staff.
- ♦ Percentage of permits – the fee is calculated as a percentage of the original permit fee.
- ♦ Other increments – fees are calculated based on increments such as number of sheets or number of set ups/take downs.

Planning, Building, Environmental Health Services (PBES)

PBES – Building

The Building Division is dedicated to upholding the safety and integrity of the building environment by enforcing the most current standards of the California Building Code, along with applicable County ordinances and state and federal regulations. It administers the California Building Standards Codes as adopted and modified through local ordinances, ensuring that all construction activities support the protection of life, health, and public safety. This mission is carried out through the issuance of building permits, comprehensive plan reviews, and on-site construction inspections.

Building permits and plan checks benefit individuals and the development community and are therefore eligible for cost recovery. Because these fees primarily benefit the fee payer, the fees are set at or close to 100% of the cost of recovery.

Within the Building and Safety division, current fees analyzed recover 75% or \$3,281,127, with actual costs at \$4,396,808, which is a difference of \$1,115,681 or 25%. If staff recommendations are adopted, cost recovery would increase to 97% or \$4,273,195, adding an additional \$992,068 in projected revenue.

In keeping with State law, the target cost recovery percentage must not exceed 100%. Assuming no loss in demand or change in volume, fee adjustments result in a 97% overall recovery rate. We are proposing fee reductions on some permits and fee increases on others to keep the cost aligned with the level of effort to provide the services and to keep within State cost recovery limits.

Fee Analysis Highlights

A total of 122 fees were analyzed across the following fee sections listed below.

Fee Sections Analyzed

- Mechanical Services
- Electrical Services

- Plumbing Services
- Miscellaneous Building Services
- Building Inspections
- Building Plan Review
- Mobile Homes
- Solar Permits
- Code Compliance
- Appeals
- Fees Collected for State Agencies
- Technology Surcharge

Fees Removed

Five (5) fees are recommended for removal, either because they are obsolete, no longer charged, duplicates, or were consolidated with another current fee.

- Renewal Reinstatement Request Fee Change to Permit Extension
- Plan Retention Fee
- Imaging Plan Retention – Commercial (per page) (min. fee \$5)
- Imaging Plan Retention – Residential
- Certificate of Occupancy

New Fees

To reflect the current services and activities offered by the Building Division, fifteen (15) new fee categories have been developed and are proposed for adoption.

Festival Permits :

- Temporary Event Category 2A: 50 Persons or Fewer Per Day
- Temporary Event Category 2A Subsequent: 50 Persons or Fewer Per Day
- Temporary Event Category 2B: 51 to 200 Persons Per Day
- Temporary Event Category 2B Subsequent: 51 to 200 Persons Per Day

- Temporary Event Category 3: 201 to 400 Persons Per Day
- Temporary Event Category 3 Subsequent: 201 to 400 Persons Per Day
- Temporary Event Category 4: 401 or More Persons Per Day
- Temporary Event Category 4 Subsequent: 401 or More Persons Per Day

PBES – Environmental Health

The Environmental Health division's fee analysis was presented in the report submitted to the County Board of Supervisors in November 2024. The division has subsequently made revisions to the previously submitted fee analysis and recommendations. They have revised twelve (12) CUPA fees that were discovered to have incorrect time estimates. They are also adding nine fees for Building referral reviews that weren't included in the previous report.

The revised Environmental Health fee schedule can be found in Appendix A.

Assessor

The Assessor department provides information to the public regarding property tax, document recording and other related issues. Some of the duties of the department include property tax assessment and parcel map maintenance.

MGT's analysis found that thirteen (13) Assessor fees are not recovering the full cost to provide services. Cost recovery percentages range from 15% to 93%. The department is recommending that all these fees, with one exception, be increased to recover the cost to the county for providing these services. They are recommending that the Assessor Certification fee remain at five dollars (\$5.00).

Additionally, MGT's analysis found that six (6) Assessor fees are over-recovering cost; that is, the fee is higher than the cost to the county to provide services. California law states that a public agency cannot charge more for a user fee than the cost to provide services; therefore, these fees will need to be lowered to be compliant with state law.

The department is also recommending the following fee changes:

- ♦ Williamson Act Estimate (simple estimate) – remove "simple estimate" language and replace flat fee with an hourly fee.
- ♦ Williamson Act Estimate (complex estimate) – remove this fee.
- ♦ Historical Mills Act Estimate (simple estimate) – remove "simple estimate" language and replace flat fee with an hourly fee.
- ♦ Historical Mills Act Estimate (complex estimate) – remove this fee.

See Appendix A for details on individual fees.

Recorder-County Clerk

The Recorder-County Clerk department is responsible for the official recording, filing, and preserving of real estate documents and birth, marriage and death records for Napa County. The Recorder maintains official records to provide a public record and to give constructive notice of transactions relating to real property in Napa County, serves as the local registrar of marriages and keeps the birth and death records for the County. All documents are filmed and indexed in order that copies may be prepared upon request. Records are made available to the public for property searches and for genealogical research. The County Clerk files and maintains indexes of non-court related documents, bonds, fictitious business name statements (FBNs) and issues marriage licenses.

MGT's analysis found that twenty-four (24) Recorder-County Clerk fees are not recovering the full cost to provide services. Cost recovery percentages range from 60% to 97%. The department is recommending that all these fees be increased to recover the cost to the county for providing these services. Ten (10) fees were found to be fully recovering their cost through fees. The remaining 54 fees are set by statute and therefore are not subject to fee increase. These fees were excluded from the analysis.

The department is proposing a new fee to recover the cost of processing a returned check.

See Appendix A for details on individual fees.

Information Technology Services - GIS

Within the Information Technology Services department, the Geographic Information System (GIS) division brings land use, environmental, emergency, utilities, and other valuable mapping information to everyone living or working in Napa County.

GIS currently has two (2) user fees on their fee schedule:

- ♦ Copies on DVD – This fee is no longer requested by customers; therefore, GIS is recommending it be removed from the schedule.
- ♦ Copies on external hard drive - MGT's analysis found that GIS is recovering their cost to provide this service, therefore the department is recommending the fee remain the same.

GIS is proposing one (1) new hourly rate fee be added to their schedule. This fee will enable the department to recover its costs should additional services be requested. The hourly rate is a blend of two positions, either of which could provide requested services.

See Appendix A for further details.

Fire

The Fire department's fee analysis was presented in the report presented to the County Board of Supervisors in November 2024. The department has subsequently made minor revisions to the previously submitted fee analysis and recommendations. Most of the revisions to the verbiage of

the fee descriptions. The most significant change proposed is for Fire's review of the Building plans. Currently the department collects 22% of the Building fee for their review. They are recommending this percentage be increased to 50% for the following reasons:

The Fire Marshal's Office now conducts a significantly expanded review process that justifies increasing Building Plans Review and Inspections from 25% to 50%. Reviews now include detailed evaluation of addressing and access (e.g., gates, emergency vehicle access, turnouts, and turnarounds) in accordance with NCRSS standards. Compliance is also required with a range of fire and life safety codes, including the new Title 24 Part 7, CBC Chapter 7A, CFC Chapter 49, Title 14, PRC Sections 4290 and 4291, and the Health and Safety Code. Water supply systems must meet NFPA 1142 or Fire Code Appendices B and C, and in some cases NFPA 20 and 22, addressing fire flow, hydrant spacing, and fire pump specifications. For commercial projects Reviews also encompass exit systems (path of travel, signage, lighting, door hardware), fire extinguisher placement, fire-rated construction, and fire pump room requirements. This broader and more technical scope necessitates increased staff time and expertise.

Additional revisions being proposed to Fire's fees are to add two new fees set at actual cost: Fire Investigations and Weed Abatement, and to remove the Fireworks Display fee, as fireworks displays are no longer allowed in the County.

The revised Fire fee schedule can be found in Appendix A.

Public Works (Roads, Flood and Administration)

The Public Works department's fee analysis was presented in the report presented to the County Board of Supervisors in November 2024. The department has made three fee revisions to the previously submitted analysis and recommendations. All revisions pertain to the department's review of Building permits:

- ♦ Building Application Review – Residential – change from hourly to flat fee of \$86.
- ♦ Building Application Review – Commercial – change from hourly to flat fee of \$86.
- ♦ New hourly fee for building reviews not otherwise indicated.

The revised Public Works fee schedule can be found in Appendix A.

Recommendations

MGT recommends that the County build on its investment in this cost-of-service analysis by continuing to analyze its fees and charges. Once the commitment is made to understand the full cost of providing services, it is important to review and update the analysis to keep pace with changes in service delivery, staffing changes, and demand levels.

One of the primary recommendations surrounds the General Plan Surcharge Fee. MGT recommends this fee be deposited into a Special Revenue account. This will hold the revenue and put restrictions on which services/supplies are allowed to be purchased. MGT also supports the County in the increase of the General Plan Surcharge Fee, from a 3.3% increase to a 7.5 - 10% increase and expand its application to all Building and Planning permits. This should supply the additional revenue to offset the costs of updating the County's General Plan and Housing Plan.

Most of our agencies ask us at the conclusion of the study: how often should this type of study be undertaken? Our advice is to undergo this detailed analysis at least every three but not more than five years, with minor adjustments in the non-study years (to keep pace with economic impacts). Some of our clients undergo these studies every other year, some have opted to split the study over the course of three years (i.e., a subset of departments gets studied every year, with each department's fees being analyzed once every three years), and finally we have other clients who have chosen to review fees every fourth or fifth year. Virtually every client has set up minor adjustments (typically using CPI percentages) in the off years, to mitigate any significant increases that may occur when the detailed cost analysis is undertaken in future years. This is particularly helpful once an agency has chosen to adopt a cost recovery policy – whether 100% of the cost or something less – to keep fees at the desired level.

MGT also recommends that our clients consider a phase-in approach to some fees where the increase necessary to reach the proposed recovery level is so high that a one-year implementation is cost prohibitive.

Appendix A - User Fee Results

The following pages provide the individual fee study results.

PBES: Building

Agency: Napa County
