### Considerations:

The AB481-reportable equipment inventory sheets contained within this document were compiled during Q1 2025. Since the last report, no new qualifying reportable equipment categories have been added to inventory.

With respect to costs, funding, annual upkeep expenses and estimated effective lifespan, every effort has been made to be as accurate as possible while at the same time acknowledging that many factors directly affecting those aforementioned values are unpredictable.

Costs associated with the following items represent the best estimates at the time this document was prepared. Many of these items are not purchased from manufacturers, but from dealers, who adjust costs in accordance with market factors beyond the predictive abilities or control of Napa SO.

Due to the unpredictable nature of the law enforcement profession, many of the item estimated upkeep costs and effective lifespans are best estimates and may vary greatly on a year-to-year basis, due to the availability of training, type of operational incidents or other factors.

“Annual Allocation” refers to the quantity needed “on hand” over the course of a calendar year to meet all reasonably-anticipated operational and training needs. Some items may be carried over in inventory year to year depending on operational/training tempo.

With respect to terminology, “expendable equipment” items are items that typically have a one-time use and then cannot be used again, such as chemical agents or smoke grenades.

In an effort to be as efficient as possible, many items, both “expendable” and otherwise have operational applications across a diverse set of Napa SO missions. For example, “40mm launcher (single and multi-shot capability)” is an item that is utilized by Napa SO Patrol, SWAT, Mobile Field Force and other auxiliary assignments. The cost and unit allocation estimates that state “across all divisions” represents the best estimation of the requirements for those items to fill all needs for the Sheriff’s Office.

Additionally, there are costs for non-AB481 equipment that are intrinsically tied to the costs for the following items. For example, slings, carrying cases, magazines, sighting systems, flashlights, cleaning supplies, batteries and other non-AB481 reportable items are not included in the cost estimations, unit allocation or upkeep portions of this report.

It should also be noted that the legislature has designated these items as “military equipment”. While the military may use some of the same equipment, the Sheriff’s Office (SO) deems all of this equipment as law enforcement equipment. Much the same as the military using handcuffs, there are items in common. The manner and reason they are used is significantly different.

For many years, this office has also displayed and offered education about our equipment and why we use it. The vast majority of equipment on this list was approved for funding through the County of Napa. From our Citizen’s Academy to National Night Out, we have always been open for discussion and education
